

UrbanRetail Group LLC Sustainability Impact Report

Category	Details	Estimated Annual CO2 (tons)
Energy Efficiency	Retail storefront electricity usage including lighting and refrigeration totaling 210,000 kWh annually.	84
Transportation Impact	Delivery van fuel usage and third-party courier services for 65 customer orders.	65
Supply Chain	International apparel imports via sea freight and domestic distribution networks.	115
Waste	Landfill waste, cardboard recycling, and seasonal packaging disposal.	30
Other	Cloud-based POS systems, digital marketing services, and office supply procurement.	22

Executive Summary:

UrbanRetail Group's emissions profile is dominated by supply chain imports and energy-intensive retail operations. Strategic sourcing adjustments and LED lighting upgrades could significantly improve their sustainability score while reducing operational costs.
